Milestone
HUSKY™ M20

The quickest, easiest installation **you've ever done**

The Husky M20 is the shortest route to an all-in-one surveillance solution

80

The industry's most predictable installation process: With Milestone Smart Start, most of the setup is done for you so all you have to do is the final tweaks.
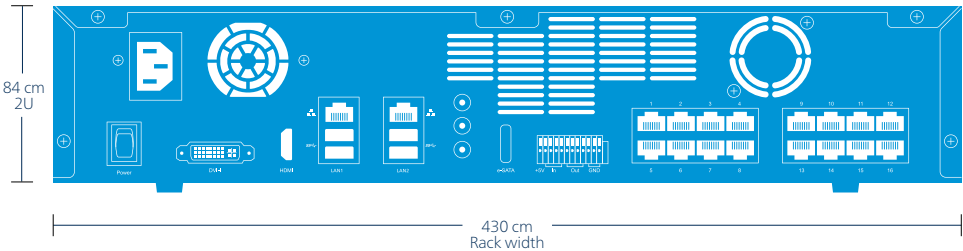

An NVR that basically installs itself: Smart Start plug-and-play features automatically configure storage allocation, identify network cameras and syncronize devices with the time server.

More time to do more business: An integrated managed Power over Ethernet (PoE) switch makes system design, installation and power management a breeze.
