**YOUR EYES  
EVERYWHERE**

CAMERAMANAGER CLOUD-BASED VIDEO  
SURVEILLANCE SERVICE BY PANASONIC

## WHEREVER YOU ARE, KEEP AN EYE ON THE THINGS THAT MATTER

Wherever you are in the world, whatever the time of day, Panasonic's Cameramanager cloud-based surveillance service means you can always keep one eye on the things that matter most to you. Whether it's an elderly relative, your children or simply your home, our remote security solutions allow you to watch over them, through real-time monitoring accessed via your desktop, laptop, tablet or your smartphone. All set up in three easy steps, with automatic push notifications, and at a very affordable cost.

### EASY LIVE ACCESS TO YOUR HOME

Wouldn't it be great to know that, whatever happens, you could always view who has been in or around your house? Our fully featured camera solution is cloud-based and easy to setup. Within 60 seconds you're online and ready to check your home from your desktop, laptop, tablet or smartphone.

### AFFORDABLE SURVEILLANCE FOR EVERYONE

You might think such powerful cloud-based camera surveillance carries a high price. Not Cameramanager. It's an affordable solution where you pay a low monthly fee per camera. In fact, when compared to a local recorder or traditional video management software, you could easily save up to 80% for every camera.

### SHARE WITH YOUR FAMILY AND FRIENDS

Cameramanager is designed to be shared with your family, friends and neighbours, to help secure personal belongings and premises. Thanks to a comprehensive user management tool, you can share all features, live streams and recordings with others in your network.

### ACCESS TOTAL SECURITY ON THE GO

We offer FREE iOS and Android apps to let you easily access your cameras on the go. You can quickly check your live streams, footage or receive push notifications whenever something is happening.

## THREE SIMPLE STEPS TO COMPLETE SECURITY

Getting started with Cameramanager couldn't be easier. All it takes are three easy steps and you're ready to go.

1

**CONNECT A CAMERA TO YOUR NETWORK BY CABLE OR WIFI**

This only requires plugging in via an internet cable. An easy wizard will then add your camera to the network.

2

**FOLLOW THE EASY PLUG & PLAY WIZARD**

Second, add your camera to your Cameramanager account. This is all plug & play, of course. There's no need for port-forwarding or router settings. Our software does it all. It's that simple.

3

**WITHIN 60 SECONDS, YOU'RE ENJOYING TOTAL SECURITY**

Setting up your cameras will take you only 60 seconds. So in less time than it takes to finish a coffee, you can view your loved ones or home with your security cameras. Recording is done in the cloud, safely and securely. And you can access it wherever you are.
